

SURITI JOSHI

✉ suriti.joshi05@gmail.com www.linkedin.com/in/suriti-joshi-661910289

PROFILE

Product-minded Computer Science undergraduate with a specialization in Education Technology and hands-on experience scoping, designing, and shipping user-facing products end to end. Comfortable running market and user research, translating merchant or student pain points into feature requirements, and working across design and engineering to bring a product to launch. Drawn to Khatabook's mission of simplifying business management for India's MSMEs.

EDUCATION

VIT Bhopal University

Bachelor of Science in Computer Science (Specialization: Education Technology)

Sep. 2023 – May 2027

Sehore, Madhya Pradesh

Progressive Education School

ICSE, 12th Class (80%)

Sep. 2011 – May 2023

Indore, Madhya Pradesh

RELEVANT COURSEWORK

- Instructional Design
- Automated Workflow Design
- Educational Data Mining
- UI Design
- Educational Measurement

PROJECTS

AI Career Navigator — Personal Product Initiative

Jul 2026 – Present

- Scoping and architecting an AI career-guidance MVP that aggregates student baseline profiles to generate personalized milestone roadmaps.
- Defining core product requirements and prioritizing feature backlogs across user authentication, progress dashboards, and engine modules for a phased market rollout.

Aether News — Personalized News Product

Jun 2026

- Designed the end-to-end user experience and product flow for a regional aggregator utilizing a modular design system tested across 5 regional target markets.
- Built an explicit user-content feedback loop architecture (Interested / Not Interested) to map user preferences into 5 optimized delivery style variants.

Student Study Planner

May 2026

- Identified friction trends in student test-prep cycles and designed an automated scheduling product that translates input data into systemic, color-coded calendars.
- Validated logical flow constraints against 30+ real-world student schedules, reducing workflow overlaps and dynamically modifying allocation blocks based on remaining course volume.

Resume-Job Matching Tool

May 2026

- Formulated product requirements to bridge the structural translation gap between student application vectors and active job descriptions.
- Engineered a fuzzy-matching logic process to compute optimization scores, reducing manual revision cycles by producing explicit, actionable feedback loops for end-users.

Resource Library Automation

Apr 2026

- Mapped and systemized an automated intake and asset distribution workflow engine covering a structural database of 72 curated resources across 6 key content areas.
- Constructed conditional edge-case routing rules and algorithmic deduplication layers, preventing workflow failures and achieving 100% delivery accuracy during user execution simulations.

LEADERSHIP / EXTRACURRICULAR

Anime Club

December 2025 – Present

Treasurer

VIT Bhopal

- Directed operations and logistical execution for a large-scale campus festival installation, serving hundreds of attendees.
- Managed and balanced a strict student club budget allocation with clean transaction tracking and zero cost overruns.

Edu4U Club

December 2025 – Present

Design Team Head

VIT Bhopal

- Led a cross-functional unit of 7 creative personnel to scope, iterate, and ship comprehensive branding materials for the Advitya 2026 event inside a tight 48-hour deadline window.

SKILLS

Product & Research: Market & user research, user persona mapping, product metrics, feature prioritization, wireframing, usability testing

Technical Competencies: Object-Oriented Programming (OOP), Data Structures, Basic Databases, Logic Modeling

Tools & Collaboration: Figma, Notion, Google Workspace, Advanced Excel/Sheets, Cross-functional teamwork, Agile framework
